

Yohan David Angulo Useche

Web Developer

 yohanAngulo.gitHub.io |  +584129613339 |  anguloYohan98@gmail.com

Skills

Web development Empathy Problem-solving Adaptability Teamwork Attention to detail
Assertiveness Effective communication

Technical knowledge

JavaScript ReactJs Bootstrap Tailwindcss Git / GitHub Python SQL
WordPress HTML5 CSS3 SASS BEM Flexbox Grid PHP

Experience

Collaborations

April - 2023

- Contributed to the “**Expo Naval Nautica Lecheria 2023**” project focused on enhancing user experience by identifying and resolving software bugs and usability issues. Utilized problem-solving skills to troubleshoot issues and developed solutions through collaboration with team members.

Coding events

May - 2023

- I participated at a coding event where our team developed an application called “**Moving box**” the main goal of this application was to make an inventory of the items contained in a box in order to be able to know what items a certain box contains by just scanning a QR code. My task for this project was to give functionality to the user interface made by other team members. The technologies we used to develop this web application were ReactJs, Tailwindcss, Firebase.

Personal projects

Developed small projects such as a **Simple Inventory Software, Netflix clone (UI), rock paper scissors, word finder, to-do list**, etc. in order to grasp the concepts I learned. For more refer to my GitHub account github.com/yohanangulo.

Education

- **Coding Bootcamp** - Lexpin (*Venezuela*) - **(Nov. 2022 - Present)**
- **Associate's Degree in Computer Science** - Universidad Politécnica Territorial (*Venezuela*) - **(2019 - 2020)**
Completed 1 year out of 2 for the degree program
- **Electronic Engineering** - Universidad Jose Antonio Paez (*Venezuela*) - **(2016 - 2018)**
Completed 2 year out of 5 for the degree program

Languages

- **Spanish** (Native)
- **English** (B2)
